

Web Developer / Backend

Spyridon Mihalopoulos

About me

I am a backend developer with +1 years of work experience. I also have knowledge and experience working with frontend technologies, so I can take the role of a full stack dev.

I have worked with several technologies but my strengths are using Linux as my main operating system, backend development with RestAPIs, AWS, API documentation with Swagger, Nextjs as frontend framework, sql databases like Postgresql and Mysql and my favorite programming languages are Javascript and python..
